EDUCATION

University of California Santa Cruz   September 2018 – March 2021
B.S. Computer Science   GPA: 3.8/4.0

EXPERIENCE

University of California Santa Cruz | Undergraduate Researcher   June 2020 - Present
· Leading an undergrad research team under Dr. Yi Zhang in UC Santa Cruz's IRKM Lab.
· Creating a virtual assistant for medical symptom diagnosis using state-of-the-art technologies.
· Developing a named entity recognition symptom tagger (GloVe, BiLSTM, CRF), a symptom classification model (GloVe, BiLSTM), and a conversational model.

UAES Shanghai | Software Development Intern   June 2019 – August 2019
· Developed a license plate detector using Python's OpenCV module.
· Learned and applied various machine learning algorithms, specifically convolutional neural networks, to improve upon the OpenCV license plate detector script.
· Worked with my team on an Inertial Navigation System for vehicles in an underground parking lot environment.
· Developed a Python script that automated the extraction, analysis, and transfer of compressed files from one machine to another through SSH.

PROJECTS

Tesla Stock Prediction | Python, Keras, Pandas, Matplotlib
· Used machine learning, natural language processing, and data mining techniques to try and predict Tesla stock performance based on Elon Musk's Twitter feed.
· Used sentiment analysis and implemented many predictive models, such as decision trees, random forests, naive bayes, and neural networks.

Email Viewer Web App | JavaScript, Node.js, Express, React, PostgreSQL
· Created a web app remake of Google's Gmail.
· Used the NERP (Node, Express, React, PostgreSQL) stack.

smile | Python
· Created facial recognition login software using computer vision as an alternative to Windows Hello, making facial login accessible on low-cost devices.
· Used Python for facial recognition, Batch scripts, and Windows credential providers.

hiwhatsyourna.me | Python, Flask, SQL-Alchemy, Jinja2, HTML5, CSS3, Google Cloud
· Created a web app where students can create virtual 'about me' profiles to be shared with a QR code; made to help connect students in a college dorm environment.
· Created with Python's Flask framework and a SQL-Alchemy database. Hosted with Google Cloud's App Engine.

EXTRACURRICULARS

Programming Competitions
· Competed in the USA Computing Olympiad at the Bronze, Silver, and Gold levels.
· Competed in the Lockheed Martin CodeQuest programming competition in Sunnyvale, CA.
· Competed in the Stanford University ProCo programming competition.

SKILLS

Languages	Python, C, C++, Java, JavaScript, SQL
Frameworks and Libraries	Node.js, Express, React, PostgreSQL, Flask, Scikit-Learn, TensorFlow/Keras
Technologies	Git, Bash, Jupyter, Google Cloud
